## NOTICE TO MASSEY WATER USERS

In the event of extreme cold weather conditions, we recommend that you leave a cold-water tap running in a steady stream of about 6mm (1/4 inch). Please note that the tap does not need to be fully open to prevent your line from freezing. The water entering the water distribution system is already cold so it takes very little exposure to colder temperatures for the water to freeze. If you are concerned about your septic system, run a hose out to the ditch or catch basin to drain the water away from your system.

### Additional Suggestions:

- \* Wrap foam pipe insulation around pipes most susceptible to freezing (near outside walls, crawl spaces, attics)
- \* Do not turn your heat below 13°C (55°F) at night or when the house is vacant
- \* If you are planning on being away, have someone check your house regularly

## DON'T FORGET YOUR COVID-19 ETIQUETTE

- \*Keep a physical distance of 2m (6ft)
- \*Wear a face covering when required
- \*Wash your hands regularly
- \*Stay home if you're unwell
