

Flood Warning

Sudbury District

Wednesday, April 22, 2026
2:00pm

The Ministry of Natural Resources– Sudbury District, is advising residents that a Flood Warning is still in effect and will remain until Thursday, April 30, 2026 at 12pm.

Residents in the Sudbury district, including the communities of Greater Sudbury, Espanola, Nairn-Hyman, Sables-Spanish River, Baldwin, Spanish, Killarney, Sagamok, St. Charles, French River, Markstay-Warren, and Manitoulin Island, should exercise caution along local waterways. Due to warmer weather, local streams and rivers will continue to see high flows and sustained high-water levels. Residents are encouraged to take necessary action to secure or protect property in flood-prone or vulnerable areas. Please monitor any children or pets under your care around these hazards and supervise their activities.

The ministry is closely monitoring the weather and developing watershed conditions. Further updates will be issued as appropriate.

TECHNICAL INFORMATION

Description of Weather System

The weather forecast is calling for sunny skies for the next couple of days, with daytime temperatures in the double digits and evening temperatures remaining above freezing. A new low-pressure system may enter the region this weekend, possibly bringing 10-15mm of precipitation before clear skies return Sunday and Monday.

Description of Current Conditions

Significant snowpack remains in northern sections of the major watersheds (Onaping, Vermillion, Spanish and Wanapitei) and with warming weather, water levels will be responding accordingly on local water ways. While most lakes still have some ice cover, large river systems are elevated and flowing strongly. Expectations are for sustained high water levels and flows for the next while.

DEFINITIONS

- **WATERSHED CONDITIONS STATEMENT – WATER SAFETY:** indicates that high flows, melting ice or other factors could be dangerous for such users as boaters, anglers and swimmers but flooding is not expected.
- **WATERSHED CONDITIONS STATEMENT – FLOOD OUTLOOK:** gives early notice of the potential for flooding based on weather forecasts calling for heavy rain, snow melt, high winds or other conditions
- **FLOOD WATCH:** potential for flooding exists within specific watercourses and municipalities
- **FLOOD WARNING:** flooding is imminent or occurring within specific watercourses and municipalities.
